

**COMET CERTIFIED PYTHON
COURSE BROCHURE**

Overview

Python is one of the powerful programming languages that is high-level, open-source, and most commonly used for **web development, scientific and mathematical application development, etc.**

One of the great advantages of this programming language is it provides excellent library support and has a large developer community. It also provides easy integration with web services and GUI-based desktop applications.

Python is fast, easy-to-use and the most preferred programming language for developing projects by many companies such as **YouTube, Instagram, Pinterest, and Quora, etc.** Because of its excellent features, Python is considered an easy to learn programming language for beginners and is also sophisticated enough for experienced professionals to use.

Apart from web development and desktop app development, Python is extensively used in the Data Science field and is used for developing Machine Learning projects. Because of its huge popularity, many IT professionals are learning this programming language to build their career as a Python developer.

Course Objective

This course is designed to provide Basic knowledge of Python. Python programming is intended for software engineers, system analysts, program managers and user support personnel who wish to learn the **Python programming language.**

Audience Profile

This course is for Students/IT Professionals who is interested in **Python Programming.**

Prerequisites

There are no such prerequisites to learn Python but having a basic knowledge of any programming language concepts like what is a loop, what if and else does, how operators are used, etc. will be helpful. If you have strong command over the basics of any programming language, you can learn Python quickly.

Introduction

Python Installation

Numbers

Operators

List

- List
- Nested List
- List Slicing
- List Comprehension
- List Methods

Tuple

- Tuple Methods

Set

- Set Methods

Dictionary

- Nested Dictionary
- Dict Comprehension
- Dict Methods

String

- String Slicing
- String Methods
- Regular expression

Loops

- If...Else...Elif
- While Loop
- for Loop

Range

Zip

Eval and Exec

Functions

- Variables Scope
- Lambda Function
- Map Function
- Filter Function

OOPS

- Classes and Objects
- Inheritance
- Multiple Inheritance

Exception Handling

File Handling

Basic Json Handling

Module

- Debugging
- logging
- Pexpect Module
- OS Module
- SYS Module
- Date and Time Module
- Paramiko (ssh login)
